CSE 408- Lab #2
User Interface (UI)/ User Experience (UX) Design
Project UI/UX interface

Due: Tuesday April 21st 2020, 11:50 pm

Objectives:

After the lab, you should know how to
- Design User Interfaces and eXpericne for web/desktop and smart devices
- Translate the paper design into Design Prototype using **Figma** web tool
- Translate finalized prototype into Executable prototype.

Assignment:

In CSE 308 you built the design prototype for your project. You need to design User interface that communicates with your hardware and displays the data to the end-user. Make sure to include all required features requested by the client. Refer to the project Documentation.

This is team work, I do expect everyone to participate and be part of the UI/UX design process. The Contributions (Discussion, sharing ideas, provide paper prototype, suggest new features or plot or control item … etc.) of each team member need to be listed in percentages. (you as a team need to agree on these contribution).

Material Design:
https://material.io/

Deliverables:

You need to submit in Blackboard:
1. Sharable link to the prototype
2. Export PDF of your design

Grading
This lab is worth 100 points. (70 % for the design, and 30% for the individual contribution)
